

COLLEGE OF ARTS AND SCIENCES

GEOLOGY

Faculty

- Nick Pollock (Chair)

Program Goals

- Ability to synthesize multiple lines of evidence and multiple sources of data to support geologic hypotheses
- Ability to use an Earth Systems perspective to integrate understanding of geologic processes across disciplines
- Ability to evaluate data necessary to answer a particular question
- Ability to think and extrapolate across a broad range of temporal and dimensional scales
- Ability to work collaboratively to break a complex problem into simpler, individually achievable tasks
- Ability to work together constructively in challenging field environments
- Ability to explain geologic information at a level appropriate to the audience
- Ability to read and understand the geologic literature and to create original research reports
- Ability to communicate scientific information through verbal and written presentation of data, graphics, and maps.
- Ability to assess the effects of human activity on the natural environment
- Ability to bring a geologic perspective to discussions of social issues

Objectives

The Geology program offers a Bachelor of Science degree for students interested in understanding the earth. The degree incorporates a diversity of both perspectives and methods. Classes incorporate lecture, lab, and fieldwork to study our planet's physical, chemical, and biological history.

Program Requirements

Students must maintain a minimum 2.3 GPA in all courses required for the major.

Students must meet the university-wide graduation requirements in addition to the Geology major:

- 124 total hours
- 30 upper division hours
- WCore or Honors College requirements

For course prerequisites, please refer to the course descriptions.
